Stereoscopic Production Pre-conference Symposium

Sponsored by DLP Cinema/Texas Instruments and Sony Electronics

This intense, one-day program will provide the broadcast, production, or cinema engineer with a roadmap for exploring the stereoscopic production landscape, from acquisition to the latest projection systems. Leading industry experts will explain the core technologies, applications and challenges of managing a 3D production pipeline. [[Full Session Descriptions](#)]

2007 Professional Video Monitors Report

SMPTE Members Receive 20% Discount!

Insight Media has released the 2007 Professional Video Monitors Report. CRT monitors used in broadcast, post production and other high-end professional applications are nearing the end of their manufacturing life. What will replace them and can these replacements live up to the needs of the users? The 2007 Professional Video Monitors Report is available to SMPTE members for only \$799. [[More Info](#)]. (additional report details, Table of Contents, SMPTE member link)
