

SMPTE Standards Administrative Guideline AG-10 Liaisons

Approved: 2020-01-07

Effective: 2020-01-21

This Standards Administrative Guideline forms an adjunct to the use and interpretation of the SMPTE Standards Operations Manual. In the event of a conflict, the Operations Manual shall prevail.

1. Purpose & Procedures

This Administrative Guideline sets forth various details in support of the Standards Operations Manual, Section 8, “Liaisons, Delegates and Rapporteurs” specifically including the lists of organizations, delegates and rapporteurs.

AG-10 comprises this document that lists the organizations and the contacts plus the following two elements:

AG-10b external organization information

AG-10c individual contact information.

The purpose of this separation is as follows:

AG-10 is a public AG and revision requires Standards Committee (ST) approval.

AG-10b is a public element of AG10 and revision does not require ST approval.

AG-10c is a confidential (to ST) element of AG-10. Revision does not require ST approval.

The Standards Operations Manual states that the Director of Engineering maintains this AG. This task may be delegated.

As the information in the tables is a matter of factual accuracy only and does not alter the operation of the Standards program or the Standards Committee, the tables themselves in all the parts of this AG are maintained analogous to an “administrative register” – they are updated from time to time and posted without Standards Committee approval. Changes to non-tabular parts of this document require Standards Committee approval. The following procedures shall guide the maintenance of the tables:

1.1. Adding New Organizations

New organizations should be added when either:

- 1) SMPTE enters into a written liaison agreement with another organization; or
- 2) SMPTE has transmitted or received a liaison communication from a new organization.

1.2. Deleting Organizations

Organizations should be deleted when either: 1) a formal liaison agreement terminates; or 2) there has been no communication with the organization in at least two years. The latter does not apply to organizations with which we have a formal liaison agreement in effect.

1.3. Updating Information

Information should be updated periodically as needed when appointments and contact information details change.

1.4. Notifications to ST

The Standards Committee shall be notified in advance of the following events:

1. A new organization is added; or
2. An organization is deleted.

2. Organizations, Delegates and Rapporteurs

Organization	Org Contact	@ SMPTE	SMPTE Role
3GPP	3GPP Liaison Officer		Choose an item.
AES	Richard Cabot	Kent Terry Brian Vessa	HOD Alt HOD
