**Evening Presentation Notice**

**Topic:** Large Camera Sensor Revolution

**Date:** Tuesday, October 22nd, 2013  
**Time:** 19:00 (Happy hour from 18:00 till 19:00)  
**Location:** LL Lozeau  
6235 Saint-Hubert, Montreal, QC, H2S 2L7  
Parking on St-Hubert & nearby streets.  
**CAUTION:** Read the parking signs in order to avoid unpleasant surprises at the end of the evening.  
Meeting point will be at the main entrance

**Organized by:** Michel Paquet, CBC  
**Sponsored by:** LL Lozeau

For its second evening of the season, your SMPTE Montreal Chapter is pleased to team-up with LL Lozeau for an evening hosted by several of our industry colleagues on the fast paced evolution of the image capture sensor systems.

But before we start the evening you are all invited to a happy hour held from 18:00 to 19:00. A light snack will be served.

Since 2008, when video recording capable DSLR cameras where made available, the DSLR camera world has undergone major changes.

Whether a professional cameras or ping-pong ball size cameras, all large sensors cameras promise astounding images.

How can one make the right choice?

In order to clarify this technological revolution, we are offering two presentations touching the technical aspects as well as the artistic aspects.

Mr. Juan Jose Cea-Escobar from LL Lozeau as well as Mr. Jonathan Dupras, Mr. Patrick Morin and Mr. Pierre Mainville from the CBC will cover both aspects of this revolution.

Mr. Dupras and Mr. Cea-Escobar will help us understand the following technological issues:

- Image capture technology evolution  
- Technical and artistic aspects that would influence the choice of a camera.  
- Optical issues related to large sensors (lens selection)  
- Issues related to the use of prosumer cameras in a production environment.  
- Programmed obsolescence

As for Mr. Morin and Mr. Mainville presentation, it will cover the artistic issues:

- Pros and cons of larger sensors camera versus traditional cameras.  
- New artistic possibilities made available by this new technology.
