

SMPTE 2052 CAPTION FLOW

SMPTE Timed Text is the key to making Internet video accessible to the deaf and hard of hearing. It has been adopted by the Federal Communications Commission as a safe harbor interchange and delivery format. This diagram shows the many workflows supported.

SMPTE is the preeminent standards development body in the motion imaging and media industry. SMPTE Standards help the industry make the connection between the development of key media technologies and the business drivers that facilitate interoperability and industry growth. Join the SMPTE standards process and participate in the development of future standards. To learn more about SMPTE Standards Committees go to <https://www.smpte.org/standards/engineering-committees>.
