On June 16th, Télé-Québec inaugurated its new HD/SD broadcast center.

Mr. Luc Chartier and his collaborators will present Télé-Québec needs and expectations for the migration of their outdated analog broadcast center to an up to date HD/SD digital facility.

The presentation will include:

1. Context and mandatory reorganization for a new broadcast center;
2. Global concept and work planning;
3. Image format management (AFD), Kaleido, IControl and MPEG encoding;
4. Ingest, automation, servers, channel dressing and hearing impaired coding management;
5. Audio metadata management: stereo, 5.1 and AC3;
6. Digital archiving;

A site visit will follow the presentation.
